

## ProPlus™ Technician Harness

The Technician™ Harness is designed to be used by those whose work requires the use of multiple safety systems at one time. One example of a multiple safety system operation is when a technician climbs a wire rope ladder to a truss and then walks along the truss.

OSHA allows only one hook in a fall arrest ring at a time. The Technician™ harness is equipped with two dorsal rings, one of which is attached to a 9" web extension. This arrangement allows the worker to not only meet OSHA requirements, but also more easily connect to a Self-Retracting Lifeline (SRL).

**Meets current OSHA requirements and ANSI/ASSE Z359 Standards**

### Harness Specifications:

- Cross over style
- Dorsal and sternum rings
- Additional extended dorsal ring
- Hip rings for work positioning
- Shoulder adjustment points
- Adjustable leg straps
- Sub-pelvic strap
- Leg and shoulder pads for comfort
- 1.75" Polyester webbing
- Bayonet buckle connectors
